

While I do not have local traffic and weather reports for Seattle at this time, I am eagerly awaiting their reception on my satellite radio system. Very simply put, satellite radio will provide me with ON DEMAND local traffic conditions and weather and this is something that commercial radio stations simply do not provide. Often it is difficult if not impossible to find the current local traffic conditions on the radio when you need them. For this and other reasons I am a great supporter of satellite radio. You would be doing a great disservice to a large number of consumers if you limited our rights to purchasing this information. Simply put, you would be stifling my rights as a consumer and those of a competing industry that is working hard to provide a quality product for a reasonable price. I urge you to finally stand up to the special interest groups represented by large corporate media holders.
